

ALL the delegates who attended our previous workshop on "How to have a Successful Career" said they would recommend it to a colleague. They also said "**This workshop...**

...gives you time to think about yourself and where you want to take your career forward."

...is good for a boost if you feel stuck."

...is a good balance of strategy, practical tips and lessons for career progression."

...is not a 'cheesy' course – it had real learnings and benefits!"

...will help you understand yourself better and is good for self-confidence."

...made me realise that it's important (and possible!) to stay true to yourself."

... helped to know that other women are dealing with similar issues."
